

1. **Introduction**: The European Union has adopted a strategy of "Europe 2020" to promote sustainable development and combat poverty by 2020. This strategy aims to achieve a balanced economic growth, social inclusion, and environmental protection. The European Commission has proposed several measures to support this strategy, including the establishment of a European Green Deal, the promotion of renewable energy sources, and the development of a circular economy.

2. **Policy Objectives**: The European Green Deal aims to make Europe the first climate-neutral continent by 2050. It also aims to ensure that all citizens have access to sustainable energy, clean water, and healthy environments. The European Commission has proposed a range of measures to achieve these objectives, including the revision of the EU's climate and energy policies, the promotion of green technologies, and the development of a green economy.

3. **Implementation**: The European Green Deal is being implemented through various policy instruments, such as the EU's climate and energy package, the EU's green deal, and the EU's green economy. These instruments aim to encourage investment in green technologies, promote energy efficiency, and reduce greenhouse gas emissions. The European Commission is also working with member states to develop national plans for the implementation of the European Green Deal.

4. **Impact**: The European Green Deal is expected to have a significant impact on the European economy, creating new jobs and opportunities in the green sector. It is also expected to help combat climate change and protect the environment. The European Green Deal is a key part of the European Union's strategy to achieve sustainable development and combat poverty by 2020.
